Zack Polymer Screed

# ZPS - A Floor Transformer System

## Proven To Save Problematic Floors...

Before

After

ZPS is a thin polymer screed system that is applied onto the rejected floor without removing it. The floor finish can range from basic to high polished with flatness control. It is most suitable to refurbish old existing floors in car parks, factories, warehouses, etc. This system is designed to hide undulation, repair damages of the floor and also to brighten up the ambient lighting for the end users.

- \* Eliminates undulation of floor
- \* Enhances appearance
- \* Minimal effect on head room
- \* Flat surface finish
- \* Increases safety
- \* Smooth operation for forklifts
- \* Good grip
- \* Ready to receive finishing (tiles, paint, parquet, etc)
- \* Seamless
- \* Wide coverage area of application
- \* Fast drying
